The \texttt{har2nat} package*

This small package allows a \LaTeX{} document containing the citation commands provided by the \texttt{Harvard} package (Peter Williams and Thorsten Schnier) to be compiled using the \texttt{natbib} package (Patrick W. Daly). Migration from \texttt{harvard} to \texttt{natbib} thus can be achieved simply by replacing

\begin{verbatim}
\usepackage{harvard}
\end{verbatim}

with

\begin{verbatim}
\usepackage{natbib}
\usepackage{har2nat}
\end{verbatim}

\textbf{Important:}
\texttt{har2nat} must not be loaded before the \texttt{natbib} package as it redefines the \texttt{natbib} commands \texttt{\cite} and \texttt{\citeyear}. All other \texttt{natbib} commands remain unchanged and can be used alongside the \texttt{Harvard} commands.

*This manual corresponds to \texttt{har2nat} v1.0, dated 2005/12/01.
