

Test document for software entries

Inria Software Citation Working Group

January 6, 2021

This is a test document that showcases the possibilities for rendering the various software-related bibliographic entries with the standard BibLaTeX style extended with the `software` module.

- software entry CGAL [4] and Scilab [5]
- softwareversion entry CGAL 5.0.2 [10]
- softwareversion Scilab 1.1.1 : from the chain of crossrefs [11], and from the condensed bibtem [12] (they should be identical)
- softwaremodule entry Voronoi: from the chain of crossrefs [8], and the from the condensed bibtem [9] (they should be identical)
- software entry Parmap [2]
- codefragment entry simplemapper [7]
- software entry from the Astrophysics Source Code Library, using the eprint field [3]
- software entry from the swMATH catalog, using the eprint field [1]
- documentation in a software entry [6]
- software entry [0] and related article [0] from the IPOL journal

References (*default style*)
